

# Children's attitude survey

Use this survey with the children in the *Talk Boost KS1* group during the first week of the intervention and again at the end of the 10-week programme. Amend the wording as appropriate given your knowledge of the child.

The same class teacher or teaching assistant should complete the survey, using the same wording, on each occasion. Use the faces on the card to help the child indicate their level of feeling or awareness. Use the box on the next page to record any additional comments from the child.

When you've completed the survey with the child you can use the online scoring tool at [www.talkboostks1tracker.org.uk](http://www.talkboostks1tracker.org.uk) to calculate the scores and the change between before and after the *Talk Boost KS1* group.

Name:	Year group/class:	Date:
-------	-------------------	-------

1. How do you feel about going to school?
